In Employment and Unemployment

U.S. Department of Labor  
Employment and Training Administration  
July-December 1979

Area Trends in Employment and Unemployment contains the official list of labor surplus areas as classified by the Department of Labor and in which employers are eligible for preference in bidding on certain Federal contracts. The purpose of designating labor surplus areas is to put the Federal Government's procurement dollars into areas of high unemployment. The authority for carrying out such classifications of labor surplus areas stems from Defense Manpower Policy No. 4B (DMP-4B), Executive Order 10582 (implementing the Buy American Act), and Executive Order 12073 (Federal Procurement in Labor Surplus Areas).

This issue of the publication contains the listing of labor surplus areas under the recently revised classification procedures. Two new areas were added to the list due to exceptional circumstances. A copy of the new regulations describing the revised classification procedures is provided at the end of this issue. In addition, this publication also provides summary labor force data on major labor areas as well as a classification of these areas according to the adequacy of labor supply.

Descriptions of the program for which areas are eligible on the basis of high unemployment and the criteria used in determining such eligibility as well as a listing of the eligible areas are provided in the section "Eligible Areas for Bidding on Federal Contracts Under Defense Manpower Policy No. 4B (DMP-4B) and Executive Orders 10582 and 12073."

A description of the criteria used by the Department in classifying major labor areas according to the adequacy of labor supply is provided in the section "Labor Supply Classifications and Summary Labor Force Data for Major Labor Areas."

Requests for copies of Area Trends, changes or additions to the mailing list, and further information on its contents should be addressed to:

# Eligible Labor Surplus Areas for Bidding On Federal Contracts Under Defense Manpower Policy No. 4B (DMP-4B) And Executive Orders 10582 and 12073

## Background

Employers located in eligible labor surplus areas, as determined by the Department of Labor, and who meet other criteria, are entitled to preference in bidding on Federal procurement contracts. The criteria used in determining eligible labor surplus areas implement amendments to the Small Business Act (PL 95-89) as well as Defense Manpower Policy No. 4B (formerly DMP-4A), Executive Order 10582 (implementing the Buy American Act) and Executive Order 12073 (Federal Procurement in Labor Surplus Areas).

The criteria used in determining eligible labor surplus areas were recently revised and published in the *Federal Register* on January 3 and January 5, 1979. A copy of the revised regulations is provided at the end of this issue.

Although new procedures for classifying labor surplus areas were previously revised on March 3, 1978, they were further revised in order to take account of comments received on them and to more effectively target Federal procurement into areas most in need of such awards, as called for by Executive Order 12073, which was signed by President Carter on August 18, 1978.

The revised regulations as published in the *Federal Register* of January 3 and 5, 1979, became effective on January 1, 1979. These regulations indicate that the classifications would be done annually (rather than quarterly as under the previous procedures) and that the annual date of eligibility determinations would be May 1. However, because of problems encountered in obtaining the labor force data needed to make the determinations, it was necessary to move the annual effective date to June 1. Notification of this delay as well as a final rule which permanently changed the annual date of classifications to June 1 was published in the *Federal Register* of May 4, 1979. A reprint of this section of the *Federal Register* is provided at the end of this issue.

## Classification Criteria

Under the new classification procedures, an area will continue to be classified as a labor surplus area if the unemployment rate is at least 1.20 times the national unemployment rate during the reference period. This is

the same ratio as was used under the previous classification procedures.

In addition, a "floor" and "ceiling" unemployment rate of 6 percent and 10 percent, respectively, will also be continued. The "floor" is established in order to assure that during periods of low unemployment, only those areas with recognized high unemployment will be classified as labor surplus areas. The "ceiling" concept is established in order to assure procurement preference to areas of high unemployment during periods when the national unemployment rate is also very high.

The "floor" concept would become operative whenever the national unemployment rate during the reference period drops below 5.0 percent (i.e., 5.0 times 1.20 equals the 6.0 "floor"); the "ceiling" concept would become effective whenever the national unemployment rate during the reference period rises to 8.3 percent or more (i.e., 8.3 times 1.20 equals the 10.0 "ceiling").

The classification of areas on the basis of exceptional circumstances will also be continued under the revised procedures. Under these procedures, if an area does not meet the criteria necessary for classification as a labor surplus area, the criteria can be waived and the area classified when there has been a sudden rise in the unemployment in the area (other than seasonal or short term) that is not reflected in the area's data for the reference period. Such situations can occur as a result of natural disasters, plant closings of major employers, etc. which have a substantial impact on the area's employment and unemployment. In situations where such exceptional circumstances occur, the area can be classified as a labor surplus area upon petition from the appropriate State employment security agency.

Also unchanged from the previous procedures is the provision that until October 1, 1981, the Assistant Secretary for Employment and Training shall make determinations of unemployment rates, in classifying labor surplus areas, for those jurisdictions in Standard Metropolitan Statistical Areas (SMSAs) for which Current Population Survey (CPS) data were used to determine annual unemployment data prior to January 1, 1978. The intent of this is to assure that the eligibility of such areas is not immediately affected adversely by

the change in the unemployment estimating procedures involving the discontinuation of separate CPS estimates for these areas.

Although the classification criteria noted above remain the same as under the previous procedures, the revised procedures incorporate a number of changes in the classification criteria, effective with the current listing. One of the changes is intended to focus programs more sharply on the community level. In order to accomplish this, labor surplus areas are no longer defined in terms of labor market areas, i.e., broad geographic areas in which there is a concentration of economic activity or labor demand and in which workers can generally change jobs without changing their place of residence. Instead, the conditions for defining labor surplus areas is in terms of discrete civil jurisdictions, i.e., counties, county equivalents, and cities with a population of at least 50,000. In 4 States (Michigan, New Jersey, New York and Pennsylvania), townships of 50,000 or more population are also eligible for classification as labor surplus areas. In New England, the labor surplus area classifications for Maine, New Hampshire, and Vermont are based on county data while in Connecticut, Massachusetts and Rhode Island, the classifications use towns as county equivalents.

By classifying labor surplus areas in this way, i.e., in terms of civil jurisdictions rather than labor market areas, funds will be directed to specific localities with high unemployment rather than to all jurisdictions in a given metropolitan area, not all of which may suffer from the same degree of unemployment. This replaces the previous classification criteria involving a "component jurisdiction." Under the component jurisdiction criteria, the areawide unemployment rate for the reference period was at or above the "floor" (i.e., 6 percent); the area contained one or more jurisdictions (city, county or county equivalent) of 50,000 or more

population and an unemployment rate at least 1.20 times the national average during the reference period; and the number of unemployed in the component jurisdiction(s) accounted for at least 25 percent of the total number unemployed in the overall area during the reference period. When all of these criteria were met, the entire labor market area was classified as a labor surplus area. This is in contrast with the current procedures which classify the individual jurisdictions as labor surplus areas rather than the entire labor market area.

Also revised under the new procedures is the reference period for the unemployment data used in applying the classification criteria. Under the new procedures, the reference period is an average of the previous two calendar years. By using an average of 24 months of data in place of the previous 12 month moving average, it will be possible to target contracts into areas experiencing high structural unemployment.

#### **Eligibility Determined Annually**

The eligibility status of labor surplus areas will be determined annually (rather than quarterly) under the revised classification procedures. The annual listings will be effective each June 1 and remain in effect for the following 12 months. The purpose of this change is to provide more stability to the contracting process.

The national average unemployment rate during the 24-month reference period used in classifying the current list of labor surplus areas (i.e., the period from January 1977 through December 1978) was 6.6 percent. Areas were included in the annual listing if their average unemployment rate during the reference period was 7.9 percent or more (i.e., 1.20 times the national rate). The following listing of eligible labor surplus areas became effective June 1, 1979 and will remain in effect through May 31, 1980.

---

#### **"Two New Areas Added"**

Two new areas were added to the labor surplus list, effective December 1, 1979 due to exceptional circumstances. They are Choctaw County, Alabama and Hamblen County, Tennessee. The addition of these two areas increases the total of labor surplus areas to 956.

This listing is complete only through December 1979 and does not reflect any areas that may have been added subsequently on the basis of exceptional circumstances.

## Labor Supply Classifications and Summary Labor Force Data for Major Labor Areas, Third Quarter 1979

### Labor Supply Categories

Each quarter the Department of Labor classifies 150 major employment centers according to the adequacy of their labor supply. A letter classification code, shown below, is assigned to each of these 150 areas.

Labor Supply Category	Description	Unemployment Rate 1/
Group A	Excessive labor shortage	Less than 1.5%
Group B	Serious labor shortage	1.5 to 2.9%
Group C	Moderate labor shortage	3.0 to 5.9%
Group D	Moderate labor surplus	6.0 to 8.9%
Group E	Serious labor surplus	9.0 to 11.9%
Group F	Excessive labor surplus	12.0 or more

1 Ratio of unemployment to area's total labor force.

The categories used in classifying major labor areas according to the adequacy of labor surplus represent a continuation of a system which has been in operation for over 25 years. Although modifications have been made in the system from time to time, the present labor supply categories as indicated above are basically unchanged since May 1955.

Unlike the area eligibility classifications under DMP-4B and Executive Orders 10582 and 12073 (implementing the Buy American Act, and Federal Procurement in Labor Surplus Areas, respectively, no attempt is made to classify every labor area in the country according to adequacy of labor supply. The labor supply classifications are provided for only 150 of the major metropolitan areas and are to be used for analytical purposes only rather than for determining eligibility for preference under DMP-4B and Executive Orders 10582 and 12073.

### Background

Although the system for classifying major labor areas on the basis of labor supply has been in operation for many years, the procedures used in making the labor supply classifications were changed as a result of revisions made in DMP-4 in March 1978. Under the new system, the labor supply classifications are now done on a quarterly basis rather than monthly as was done prior to the DMP-4 revisions. However, the labor supply classifications continue to reflect the relative severity of unemployment as a percent of the area's labor force.

As a result of the change to quarterly labor supply classifications, such classifications are now based upon the average of the area's labor force data for the 3 months comprising the most recent quarter. This may be contrasted with the previous system under which the monthly labor supply classifications were based on the area's current monthly labor force data as well as the anticipated employment and unemployment outlook over the next two months. The previous system also took account of temporary and seasonal changes in the labor force data in making the labor supply classifications. Under the new system, no attempt is made to analyze the factors responsible for an area's unemployment situation. Thus, the assignment of an area to a specific labor supply category reflects only the severity of the quarterly average unemployment.

Because of the changes introduced in classifying areas on the basis of labor supply, it may not be possible to compare the new labor supply classifications with historical data which have been published over the past several years. However, to assist in making comparisons with previous years, the monthly classification for such years will be converted to quarterly labor supply classifications and made available upon request.

The labor supply classifications provided in this issue cover the third quarter of 1979. These classifications are based upon the average labor force data for the months of July, August, and September 1979. Following is a comparison of the labor supply classifications for the first, second and third quarters of 1979 and the third and fourth quarters of 1978.

Labor Supply Group	Third Quarter 1979	Second Quarter 1979	First Quarter 1979	Fourth Quarter 1978	Third Quarter 1978
Total	150	150	150	150	150
All Groups					
Group A	0	0	0	0	0
Group B	1	2	1	5	3
Group C	94	109	69	104	83
Group D	48	35	68	36	58
Group E	6	3	10	4	5
Group F	1	1	2	1	1

The third quarter of 1979 labor supply classifications plus labor force data for each of the 150 major labor areas are provided in the table following this section.

### Labor Market Areas

A "labor market area" means a geographic area in which there is a concentration of economic activity of labor demand and in which workers can readily change jobs without changing their place of residence. Labor areas usually include one or more entire counties, except in New England where towns are considered the major geographical units.

The largest labor market areas are referred to as major labor areas. Major labor areas usually have at least one central city with a population of 50,000 or more. In most instances boundaries of major labor areas coincide with those of Standard Metropolitan Statistical Areas as determined by the Office of Management and Budget in consultation with a Federal interagency committee.

Geographical boundaries of all classified areas are listed in the Employment and Training Administration publication entitled *Directory of Important Labor Areas*. Revisions in labor area boundaries are listed in the *Area Trends*.

[4510-30-M]

**Title 20—Employees' Benefits****CHAPTER V—EMPLOYMENT AND TRAINING ADMINISTRATION, DEPARTMENT OF LABOR****PART 651—GENERAL PROVISIONS GOVERNING THE FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM****PART 654—SPECIAL RESPONSIBILITIES OF THE EMPLOYMENT SERVICE SYSTEM****Preference in Federal Procurement Under Defense Manpower Policy DMP-4A and Executive Orders 12073 and 10582****MODIFICATION OF RULES FOR CLASSIFYING LABOR SURPLUS AREAS**

**NOTE.**—This document originally appeared in the **FEDERAL REGISTER** for January 3, 1979. It is reprinted in this issue to meet requirements for publication on the Tuesday/Friday schedule assigned to the Labor Department. (See OFR notice 41 FR 32914, August 6, 1976.)

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Final rule.

**SUMMARY:** The Department of Labor is modifying its rules for classifying labor surplus areas under Defense Manpower Policy DMP-4A and Executive Order 10582 to reflect the promulgation of Executive Order 12073 and changes being made as a result of comments received.

**EFFECTIVE DATE:** January 1, 1979.

**FOR FURTHER INFORMATION CONTACT:**

Davis A. Portner, Office of Policy Evaluation and Research, 601 "D" Street, N.W., Room 9420, Washington, D.C. 20213, (202) 376-6274.

**SUPPLEMENTARY INFORMATION:****BACKGROUND**

Defense Manpower Policy No. 4A (DMP-4A), 32A CFR Part 134, became effective November 3, 1977. The purpose of DMP-4A is to encourage the purchase of goods and services by the Federal Government and the placement of Federal facilities in areas of labor surplus. Under DMP-4A the Secretary of Labor is required to classify labor surplus areas and disseminate this information for the use of all Federal agencies in directing procurement activity and locating new plants or facilities. Firms which agree to perform most of the work in labor surplus areas are eligible for preference in the award of procurement contracts and

**RULES AND REGULATIONS**

grants and the execution of agreements.

On March 3, 1978, the Department of Labor published in the **FEDERAL REGISTER** final regulations for classifying labor surplus areas under Defense Manpower Policy DMP-4A and Executive Order 10582. In order to implement DMP-4A as rapidly as possible, the Department shortened the period for comment on the proposed regulations and accepted comment during the 60 day period subsequent to the publication date of the final regulations.

On August 16, 1978 the President signed Executive Order 12073—Federal Procurement in Labor Surplus Areas. This executive order strengthened DMP-4A and provided additional authority for the Department's implementing regulations in 20 CFR Part 654.

At this time the Department is making revisions and corrections to these regulations primarily as a result of the comments which were received and the promulgation of the executive order. The changes also reflect the Department's experience under these regulations.

**SUMMARY OF CHANGES**

The primary objective of these changes is to more effectively accomplish the purpose of DMP-4A to target Federal procurement to areas of greatest need. Effective targeting is a goal of the strengthened procedures in E.O. 12073 and a central concern of the comments received on the Department's regulations.

A review of operating data indicates that the present criteria used for classifying labor surplus areas are too broad for the effective targeting of Federal funds. Based on comments received and internal analysis, the Department of Labor has concluded that the criteria for classifying labor surplus areas should be focused more sharply on communities with problems of chronically high unemployment which have the greatest need of the labor surplus set aside program. To accomplish this objective the following changes are being made in the system for defining program eligibility.

1. In order to focus programs more sharply on the community level, labor surplus will no longer be defined in terms of broad geographic areas in which there is a concentration of economic activity or labor demand and in which workers can generally change jobs without changing their residences. Instead, the conditions for defining labor surplus will be in terms of discrete civil jurisdictions, i.e., counties, county equivalents, and cities with a population of at least 50,000. In this way, funds will be directed to specific localities with high unemploy-

ment rather than to all jurisdictions in any given metropolitan area, not all of which suffer from the same degree of unemployment.

2. In order to target procurement contracts to localities with the greatest degree of unemployment, eligibility will be limited to those jurisdictions which have an average unemployment rate which is 120 percent of the national unemployment rate or higher during the reference period.

3. The reference period used in making the classifications will be an average of the previous two calendar years. By using an average of 24 months of unemployment data in place of the present 12 months, it should be possible to target contracts into communities experiencing high structural unemployment.

4. Eligibility status will be determined annually (rather than quarterly) effective each May 1. The purpose of this change is to provide more stability in the contracting process.

5. In classifying labor surplus areas for those jurisdictions in standard metropolitan statistical areas for which the current population surveys (CPS) were used to determine the annual unemployment data prior to January 1, 1978, the Assistant Secretary shall make determinations of the average unemployment rates in such jurisdictions. The purpose of this change is to prevent these areas from being penalized by the change in the unemployment estimating procedures involving the discontinuation of separate CPS estimates for these areas.

Since these regulations involve a matter relating to "public property, loans, grants, benefits, or contracts" they are exempt from the rulemaking requirements of the Administrative Procedure Act. (5 U.S.C. § 553(a)(2)). Moreover, the Secretary of Labor has determined that it is in the public interest to publish these regulations in final form so that program implementation may move more rapidly without disruption of the Federal procurement process. This finding constitutes a waiver of the Department's regulation in 29 CFR 2.7. These rules will therefore become effective January 1, 1979.

Accordingly, Parts 651 and 654, Chapter V, Title 20 of the Code of Federal Regulations are amended as follows:

**PART 651—GENERAL PROVISIONS GOVERNING THE FEDERAL-STATE EMPLOYMENT SERVICE SYSTEM**

1. The table of contents for Part 654—Special Responsibilities of the Employment Service System is amended to read as follows:

- 654.21 Interim classifications.

**AUTHORITY:** Pub. L. 95-89; 50 U.S.C. App. 2061, et seq.; 41 U.S.C. 10a, et seq.; 29 U.S.C. 49, et seq., E.O. 12073; E.O. 11725; E.O. 11051, as amended; E.O. 10582; E.O. 10480; 32A CFR Part 134.

**Subpart A—Responsibilities Under Defense Manpower Policy No. 4A (32A CFR Part 134) and Executive Order 12073****§ 654.1 Purpose of subpart.**

This subpart implements the responsibilities of the Secretary of Labor in classifying labor surplus areas in accordance with Defense Manpower Policy No. 4A of the Federal Preparedness Agency, General Services Administration (32A CFR Part 134—Preservation of the Mobilization Base Through the Placement of Procurement and Facilities in Labor Surplus Areas (DMP-4A)), and Executive Order 12073 (Federal Procurement in Labor Surplus Areas). The Secretary of Labor has delegated responsibilities to the Assistant Secretary, Employment and Training Administration.

**§ 654.2 Description of DMP-4A.**

(a) Defense Manpower Policy No. 4A (DMP-4A) consists of the Federal regulations at 32A CFR Part 134—Preservation of the Mobilization Base Through the Placement of Procurement and Facilities in Labor Surplus Areas.

(b) The DMP-4A regulations were issued pursuant to Pub. L. 95-89; Executive Order 10480; Executive Order 11051, as amended; and Executive Order 11725. Implementation of the regulations is the responsibility of the Federal Preparedness Agency of the General Services Administration.

(c) The purpose of DMP-4A is to encourage the purchase of goods and services by the Federal Government and the placement of Federal facilities in areas of labor surplus.

(d) Under DMP-4A, the Secretary of Labor is required to:

(1) Classify labor surplus areas and disseminate this information on a timely basis to Federal departments and agencies.

(2) In cooperation with State and local authorities and the Secretary of Commerce, provide labor-market data and related economic information in efforts to assist in the initiation of industrial expansion programs in labor surplus areas.

(3) Identify occupations and skills which are in surplus supply within labor surplus areas and make this information available to firms requiring such occupations and skills and interested in establishing new plants and facilities.

(4) Identify occupations and skills for which labor will be needed by new or expanding industries and industries that expand during a mobilization; and, in collaboration with other Government agencies, make assistance available to labor surplus area institutions and users in developing on-the-job, apprentice, or other training programs for developing skills of the work force.

(5) Through the affiliated State employment services, receive job openings on a voluntary basis and/or under the mandatory listing program provided for by section 2012

of Title 38 of the United States Code and by Executive Order 11701, and refer qualified unemployed workers to concerns in labor surplus areas.

(e) Under DMP-4A, all Federal agencies are required to:

(1) Use their best efforts to award all procurement contracts and grants, and execute agreements, greater than \$2,500 to concerns that will perform a substantial proportion of the manufacturing, production, or appropriate services on those contracts within labor surplus areas, to the extent that procurement objectives will permit.

(2) Ensure that firms in labor surplus areas that are on appropriate bidders mailing lists are given the opportunity to submit offers on all procurements for which they are qualified. Whenever the number of firms on a bidders mailing list is excessive in relation to size and type of procurement, a representative number of firms from labor surplus areas shall be given the opportunity to submit offers.

(3) Establish programs to encourage prime contractors to award subcontracts to firms that agree to perform a substantial proportion of the production, manufacturing or appropriate services on those subcontracts in labor surplus areas.

(4) Cooperate with other Federal departments and agencies in achieving the objectives of this policy.

(f) Under DMP-4A, the Secretary of Commerce is required to:

(1) In cooperation with State economic development agencies, the Secretary of the Defense, the Administrator of General Services, and the Administrator of the Small Business Administration, assist concerns which have agreed to perform contracts in labor surplus areas in obtaining Government procurement business by: (A) Providing such concerns with timely information on proposed Government procurements; and (B) maintaining current information on the manufacturing capabilities of such concerns with respect to Government procurement and disseminating such information to Federal departments and agencies.

(2) Urge concerns planning new production facilities to consider the advantages of locating in labor surplus areas.

(3) Provide technical advice and counsel to groups and organizations in labor surplus areas on planned industrial parks, industrial development organizations, expanding tourist business, and available Federal aids.

(g) Under DMP-4A, the Administrator of the Small Business Administration is required to make available to small business concerns in labor surplus areas all of its services, endeavor to ensure opportunity for maximum participation by such concerns in Government procurement, and give consideration to the needs of these concerns in the making of joint small business set asides with Government procurement agencies.

(h) Under DMP-4A, there is continued in operation within the Federal Preparedness Agency the Surplus Manpower Committee. The Committee is chaired by the Director of the Federal Preparedness Agency or the Director's designee. The Committee

1690

## RULES AND REGULATIONS

includes representation from the Office of Federal Procurement Policy; Department of Defense; Department of Commerce; Department of Labor; General Services Administration; Small Business Administration; Department of Health, Education, and Welfare; Department of Housing and Urban Development; Department of Energy; and other interested departments and agencies. The Committee advises the Director, Federal Preparedness Agency, on policies, procedures, and activities in existence or needed to carry out the purpose of DMP-4A.

(i) When an entire industry that sells a significant portion of its production to the Government is generally depressed or has a significant proportion of its production units located in a labor surplus area, the Committee may make appropriate recommendations relative to that industry in lieu of recommendations relative to specific geographical areas. In such cases, after notice and hearing of interested parties, the Director, Federal Preparedness Agency, gives consideration to appropriate measures applicable to the entire industry.

(j) Under DMP-4A, all Federal agencies are required to give consideration to labor surplus areas in the selection of sites for Government-financed facilities, including expansion, to the extent that such selection is consistent with existing law and essential economic and strategic factors that must also be taken into account.

#### **§ 654.3 Description of Executive Order 12073.**

Executive Order 12073 also requires executive agencies to emphasize procurement set-asides in labor surplus areas. The Secretary of Labor is responsible under this order for classifying and designating labor surplus areas.

#### **§ 654.4 Definitions.**

(a) "Assistant Secretary" shall mean Assistant Secretary for Employment and Training, U.S. Department of Labor.

(b) "Civil jurisdiction" shall mean:

(1) Cities of 50,000 or more population on the basis of the most recently available Bureau of the Census estimates; or

(2) Towns and townships in the States of New Jersey, New York, Michigan, and Pennsylvania of 50,000 or more population and which possess powers and functions similar to cities; or

(3) All counties, except those counties which contain any of the types of political jurisdictions defined in (1) and (2) above.

(4) All other counties are defined as "balance of county" (i.e., total county

less component cities and townships identified in (1) and (2) above).

(5) County equivalents which are towns in the States of Massachusetts, Rhode Island and Connecticut.

(c) "Labor surplus area" shall mean a civil jurisdiction that, in accordance with the criteria specified in § 654.5, has been classified as a labor surplus area for purposes of Defense Manpower Policy No. 4A.

(d) "Reference period" shall mean the two year period ending December 31 of the year prior to the May 1 annual date of eligibility determination.

#### **§ 654.5 Classification of labor surplus areas.**

(a) *Basic criteria.* The Assistant Secretary shall classify a civil jurisdiction as a labor surplus area whenever, as determined by the Bureau of Labor Statistics, the average unemployment rate for the civilian labor force in the civil jurisdiction for the reference period is (1) 120 percent of the national average unemployment rate or higher for the reference period as determined by the Bureau of Labor Statistics, or (2) 10 percent or higher. *Provided, however,* That no civil jurisdiction shall be classified as a labor surplus area if the average unemployment rate for the reference period is less than 6.0 percent.

(b) In classifying civil jurisdictions within those standard metropolitan statistical areas and for central cities for which current population surveys (CPS) were used to determine annual unemployment data prior to January 1, 1978, the Assistant Secretary shall, until the end of Fiscal Year 1981, make determinations of the average unemployment rates in such jurisdictions so as to assure that eligibility is not denied by the termination of the use of such surveys.

(c) *Criteria for exceptional circumstances.* The Assistant Secretary, upon petition submitted by the appropriate State employment security agency, may classify a civil jurisdiction as a labor surplus area without regard to the reference period, whenever the civil jurisdiction meets or is expected to meet the unemployment tests established under § 654.5 (a) or (b) as a result of exceptional circumstances. For purposes of this paragraph, "exceptional circumstances" shall mean catastrophic events such as natural disasters, plant closings, and contract cancellations expected to have a long-term impact on labor market area conditions, discounting temporary or seasonal factors.

#### **§ 654.6 Termination of classification.**

(a) *Basic procedure.* The Assistant Secretary shall terminate the classification of a civil jurisdiction as a labor

surplus area after any year in which the Assistant Secretary determines that the criteria established under § 654.5 (a) and (b) are no longer met.

(b) *Procedure for exceptional circumstances.* The Assistant Secretary shall terminate the classification of a civil jurisdiction classified as a labor surplus area pursuant to the provisions of § 654.5(c) after any year in which the Assistant Secretary determines that the exceptional circumstances criteria of that paragraph are no longer met.

#### **§ 654.7 Publication of area classifications.**

The Assistant Secretary shall publish annually a list of labor surplus areas together with geographic descriptions thereof.

#### **§ 654.8 Services to firms and individuals in labor surplus areas.**

To carry out the purposes and policy objectives of Defense Manpower Policy No. 4A and Executive Order 10582, the Assistant Secretary shall cooperate with and assist the State employment service agencies and the Secretary of Commerce, as appropriate:

(a) Provide relevant labor market data and related economic information to assist in the initiation of industrial expansion programs in labor surplus areas;

(b) Identify upon request the skills and numbers of unemployed persons available for work in labor surplus areas, providing such information to firms interested in establishing new plants and facilities or expanding existing plants and facilities in such areas;

(c) Identify the occupational composition and skill requirements of industries contemplating locating in labor surplus areas and make such information available to training and apprenticeship agencies and resources in the community for purposes of appropriate training and skill development;

(d) Identify unemployed individuals in need of, and having the potential for, training in occupations and skills required by new or expanding industries and refer such individuals to appropriate training opportunities;

(e) Receive job openings on a voluntary basis and/or under the mandatory listing program provided by 38 U.S.C. 2012 and Executive Order 11701 and refer qualified unemployed workers to such openings, making appropriate efforts to refer to such openings qualified individuals who reside in the labor surplus area.

#### **§ 654.9 Filing of employment service-related complaints.**

Employment service-related complaints arising under Subpart A of this Part may be filed directly with the ap-

## RULES AND REGULATIONS

1691

proper Department of Labor regional office in accordance with the provisions at 20 CFR § 658.420-423. For purpose of § 658.421, a complainant filing a complaint under this subsection shall be deemed to have exhausted the State agency administrative remedies set forth at 20 CFR § 658.410-416.

**Subpart B—Responsibilities Under Executive Order 10582**

**§ 654.11 Purpose of subpart.**

This subpart implements the responsibilities of the Secretary of Labor in determining areas of substantial unemployment in accordance with Executive Order 10582 issued pursuant to the Buy American Act, 41 U.S.C. 10a et seq.

**§ 654.12 Description of Executive Order 10582.**

(a) Under the Buy American Act, heads of executive agencies are required to determine, as a condition precedent to the purchase by their agencies of materials of foreign origin for public use within the United States, (1) that the price of like materials of domestic origin is unreasonable, or (2) that the purchase of like materials of domestic origin is inconsistent with the public interest.

(b) Section 3(c) of Executive Order 10582 issued pursuant to the Buy American Act permits executive agencies to reject a bid or offer to furnish materials of foreign origin in any situation in which the domestic supplier, offering the lowest price for furnishing the desired materials, undertakes to produce substantially all of the materials in areas of substantial unemployment, as determined by the Secretary of Labor.

**§ 654.13 Determination of areas of substantial unemployment.**

An area of substantial unemployment, for purposes of Executive Order 10582, shall be any area classified as a labor surplus area at § 654.5 of this Part pursuant to the procedures set forth at Subpart A of this Part.

**§ 654.14 Filing of employment service-related complaints.**

Employment service-related complaints arising under Subpart B of this Part may be filed directly with the appropriate Department of Labor regional office in accordance with the provisions at 20 CFR § 658.420-423. For purpose of § 658.421, a complainant filing a complaint under this subsection shall be deemed to have exhausted the

State agency administrative remedies set forth at 20 CFR § 658.410-416.

**Subpart C—Transition Provisions**

**§ 654.21 Interim classifications**

The transition from the quarterly classification of the March 3, 1978 regulations to the new annual classification system will not be fully accomplished until May 1, 1979. During the interim period, from January 1, 1979 through April 30, 1979, the list of labor surplus areas will be derived as follows:

(a) the list of labor surplus areas under the March 3, 1978 regulations for the quarter ending December 31, 1978 will remain in effect;

(b) the list will be supplemented by any additional labor surplus areas which would have qualified under the March 3, 1978 regulations for the first quarter of calendar year 1979; and

(c) upon petition submitted by the appropriate State employment security agency the Assistant Secretary may classify any civil jurisdiction which meets the basic provisions of § 654.5, as amended, based on the most recent satisfactory 12 months unemployment data.

Signed at Washington, D.C. on 29 December, 1978.

RAY MARSHALL,  
*Secretary of Labor.*
